Hopefully, all the above is quite self-explanatory, however, if you have any questions or require further information about any element, please contact us at admin@STEMworks.co.uk

We look forward to welcoming you and your teams at the Royal International Air Tattoo.

Kind regards,

Rab Doney

Information on how to get to the showground

On the day of the event, please arrive at the Competition Area which is attached to the **Technozone** shortly after **8:00 AM**. We will provide breakfast, lunch, and drinks for the students, but you may wish to bring additional snacks and drinks—especially if warm weather is expected.

If you are using a Sat Nav to find your way to RIAT, please use postcode GL7 4EG (<https://what3words.com/panel.dragonfly.drag>). When you get near to the airshow you will see colour coded AA road signs, at which point you should follow these instead of your Sat Nav.

We recommend entering via the **Red Gate**. Upon arrival, please present this letter and your ticket at the front of the queue and inform the security staff that you are participating in the **Lockheed Martin Engineering Challenge** in the **TechnoZone**. If needed, ask the gate staff for directions to the TechnoZone area.

Please be aware that traffic heading to **RIAT** will be extremely heavy, and your journey may take **twice as long as planned**. We strongly advise allowing extra travel time to ensure a smooth arrival.

Below, you'll find maps detailing the recommended routes to the Showground, as well as a layout of the Showground itself. These maps will help you navigate the area efficiently and ensure a smooth arrival.
